DETAILED ACTION

Remarks

1. In view of Applicant's arguments, the Examiner withdraws the rejection under 35 USC 103 (a) to claims 1-3 and 7. However, the claims are not in a condition for allowance in view of new ground of rejection.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1, 2, 3 and 7 are rejected on the ground of nonstatutory double patenting over claims 15 and 20 of U. S. Patent No. 6,803,693 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

Regarding claim 1, "the steps of removing at least one of the stacked lamination packages at the end of stator core and re-stacking the removed lamination packages with a lower core loss material" is equivalent to the subject matter in claims 15 and 20 of US 6,803,693: "the steps of removing the laminations of ferromagnetic alloy at the stator core ends and installing replacement laminations being formed of iron-aluminum alloy (iron-aluminum alloy has lower loss than ferromagnetic alloy)".

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Regarding claims 2 and 3, claims 15 and 20 of U. S. Patent No. 6,803,693 shows all limitations of the claimed invention except showing the stacked lamination packages comprise grain-oriented iron silicon punching (M-6) having a with-grain core loss of about 0.573 at 1.5 T (W/lb), and the replacement of the removed lamination packages comprising a higher grade grain-oriented iron silicon punching having a with-grain core loss less than M-6 such as M-4. It would have been obvious at the time the invention was made to a person having an ordinary skill in the art to use grain-oriented iron silicon punching (M-6) having a with-grain core loss of about 0.573 at 1.5 T (W/lb) for the core and a higher grade grain-oriented iron silicon punching having a with-grain core loss

Art Unit: 2834

less than M-6 such as M-4 at the core ends for the purpose of reducing core loss, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

Regarding claim 7, it is noted that all limitations of the claimed invention have been fulfilled by claims 15 and 20 of U. S. Patent No. 6,803,693
